

Weekly Build 04/01/2008

Inviato da ssjx
martedì 15 gennaio 2008

Prima build del 2008 del progetto Kestrel con una nuova chicca premendo Ctrl(Cmd)+Alt+Click e trascinando la pagina .
Known issues

- [Bug 304257] Sorting mail by date is still broken on Windows.
- opera:historysearch is currently disabled - work in progress
- Sparc Solaris builds still crash when you try to use mail
- Sometimes, the address bar dropdown stays open after submitting

Bugs fixed

- Fixed getClientRects and getBoundingClientRect
- [Bug 299224] Fixed broken account settings when adding a new IRC/Chat account
- [Bug 303604] Fixed Link icon in the toolbar not showing
- [Bug 304214] Fixed crasher on emptying trash
- [Bug 303586] Fixed spatial navigation
- Sync'ing new bookmarks in folders works again.
- Importing *.mbs files now works again. Recursively importing is still work in progress.

Mac-specific

- Help window no longer opens behind Preferences dialog

UNIX-specific

- We now search also for Acrobat Reader 8.
- 32-bit plugins (like Flash) and 64-bit plugins now work out-of-the-box in 64-bit Linux builds.

Download

- Windows
- Windows Classic
- Macintosh
- UNIX
- work in progress.
